 100 College St.
 Winfield, KS 67156-2499

JULY 11-16, 2010

BEING GREEN

What does being green really mean? At Southwestern College, green is a new way of thinking. A new way of living that is healthier for our planet, the environment and all of us too. For the past century, the way humans have been living has taken a toll on the planet Earth. Now, we must make changes and live differently.

At the Southwestern College Green Team Camp, we will learn how to live in a way that is not harmful to our planet. We will discover the fascinating new energy technologies that will power our lives in the future and learn about the small changes that we can all make in our lifestyles that will be favorable to the environment.

We all live together on this Earth, and we must work together as a team to help our planet become healthy again. Become a part of our team at the Green Team Camp, July 11-16, 2010, on the Southwestern College campus in Winfield, Kan.!

Think... Live... Be **GREEN!**

WHAT WILL WE DO?

The week will be filled with both physical and mental green educational experiences as well as leadership-building team activities.

You will:

- Build a solar car
- Play a planet-saving simulation activity
- Set goals to help make a difference in your school, community & home

We'll head to several locations to experience green living first-hand:

- Greensburg, Kan.
- The Flat Ridge Wind Farm
- The Winfield Recycling Center
- The Southwestern College Biology Field Station

Learning session topics will include:

- Why is Sustainability Important to Me?
- Renewable Energy Sources – Wind, Solar & Other Power Sources

And we'll make sure you have plenty of fun!

- Cookout
- Mini-Olympics
- Movie Night
- Sundae Night
- End of Camp Blowout!
